

BoostClean 825

Where Innovation Lives

Product Overview

BoostClean825 was formulated to be the strongest injector cleaner on the market. The one tank clean up formula features a highly effective Polyetheramine (PEA) detergent to clean and control deposits found in and on fuel injectors, carburetors, intake valves and combustion chambers. Power, performance and fuel economy is restored by cleaning the entire fuel system. BoostClean825 is compatible with gasoline with a high ethanol content.

Applications

BoostClean825 is recommended for any vehicle or equipment that runs on gasoline including carbureted, throttle body injected, multi-port injected, sequential injected and direct injected engines.

Benefits

- Improves fuel economy up to 7.9%
- Cleans and restores fuel injectors
- Cleans combustion chamber deposits
- Cleans intake valve deposits
- Dissolves gums and varnish
- Smooths idle
- Improves emissions
- Lubricates entire fuel system
- Safe for all emissions equipment
- Restores performance
- Improved acceleration
- Reduces deposit formation
- Reduces noise and vibration
- Reduces misfires
- Compatible with ethanol mixed fuels
- Provides corrosion protection for entire fuel system

Typical Properties

PROPERTY OR TEST	ASTM	RESULT
API Gravity @ 60°F	D-1250	19.46
Flash Point, °F	D-92	149
